

CUTWEL PRO EZ CHANGE®

Quick change tooling system, ideal for conventional milling machines without automatic tool change.

- Change adapters in less than 5 seconds, no wrenches required.
- Master shank available in R8, DIN2080, Morse Taper or Straight Shank.
- Adapters available in ER collet chuck, side-lock arbor, jacobs' taper drill chuck mount & face mill arbor.
- Run-out <0.015mm.
- Can also be used as a quick change system for CNC or conventional lathes using the 25mm or 32mm straight shank master.

<5 SECOND TOOL CHANGE

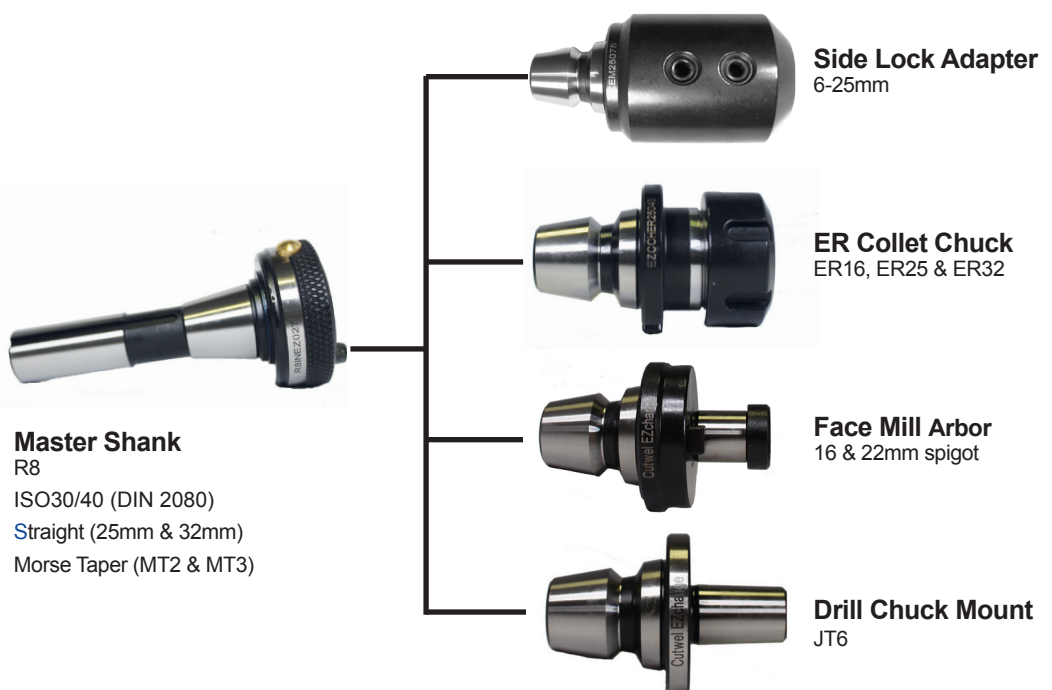

Step 1 - Load the master shank into the machine.

Step 2 - Load the adapter into the master shank (no wrenches required) and start machining.

Step 3 - Remove adapter by pressing the brass locking button and rotate the collar to unlock.

Step 4 - Place new holder into the master shank.

PLEASE NOTE: The Cutwel EZchange® system is designed for light or medium-duty applications where the ability to change tools quickly outweighs the need for extreme rigidity. We do not recommend using this system for heavy milling or high-production applications.
