

RM 3

Multi Functional Shoulder Milling Tool for Higher Productivity

- **High Quality**
True perpendicular shouldering operation
- **Excellent Productivity**
Strong thick insert and 3-face clamping for stable milling even in the toughest conditions
- **Great Value for Money**
Long tool life achieves reduced tool costs due to optimized manufacturing process

Multi Functional Shouldering Tool RM3

In this industry, requirements such as reducing manufacturing cost and improving quality are constantly in demand. This means cutting tools for mold making would have to achieve both factors. Tools must achieve high productivity and quality in a variety of applications, notably in the mold making industry, in various applications: shouldering, facing, slotting, plunging, etc. If cutting tools should have to be replaced with every application, both productivity and cost efficiency would get worse. This led KORLOY to develop the RM3. A tool specifically engineered for true perpendicular shouldering, with multi-functional capabilities.

Insert

Cutter

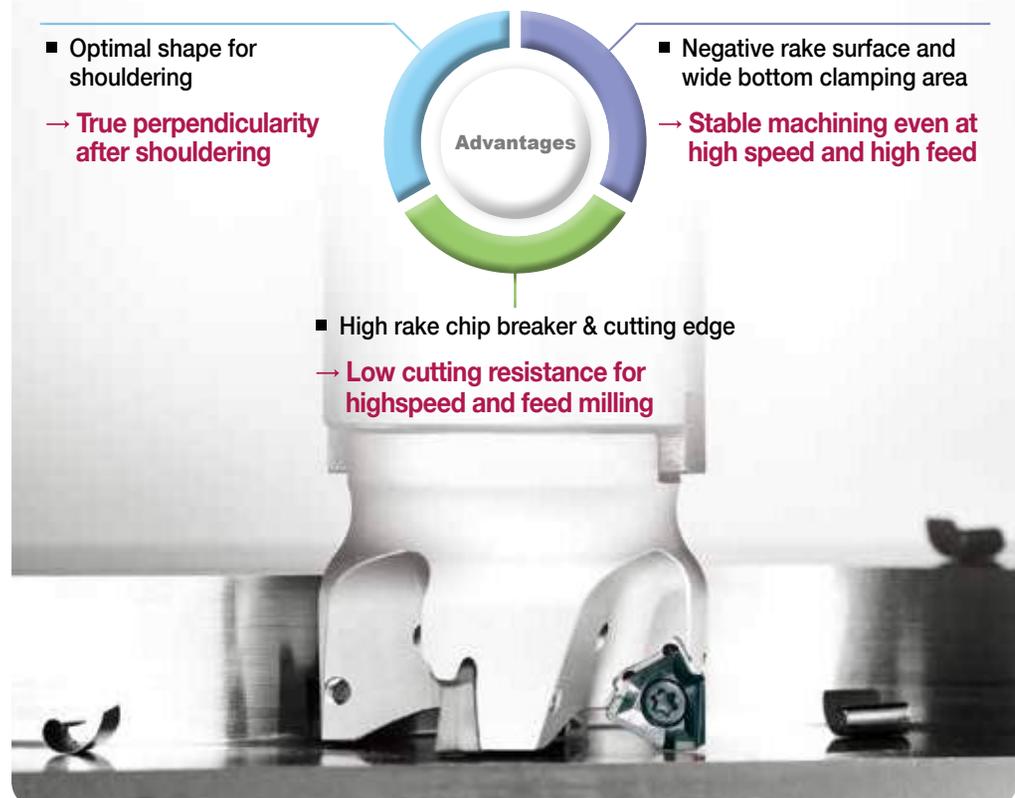

Shank

To use a single tool for various applications requires not only sharp cutting action but high rigidity and stable clamping. Poor cutting performance leads to excessive noise and burrs, and deteriorates both the perpendicularity and the surface finish. Low rigidity and unstable clamping cause vibration during operations leading to insert chipping or breakage, which shortens the tool life.

The RM3 solves all these problems and delivers higher machining stability and excellent results in quality. This 3 corner insert shouldering tool exhibits a proprietary insert design with high rake angle chip breakers & cutting edges for sharp cutting action and low cutting resistance. It additionally features a holder rigidity 2 times stronger than the existing tools, which allows a stable machining even in the toughest cutting conditions. There were lots of actual test reports that the RM3 significantly improved our customers' cycle time thanks to its high rigidity and clamping system in operations such as shouldering, ramping, facing, slotting and plunging. Even in high feed milling applications, the RM3 showed no sign of tool failure.

The RM3 also takes advantage of the true perpendicularity that largely improves surface finish. A variety of grades are prepared for machining applications in steel, cast iron, hard-to-cut materials and more. RM3 markets itself as a versatile leading milling tool that meets demanding performance and capacity requirements.

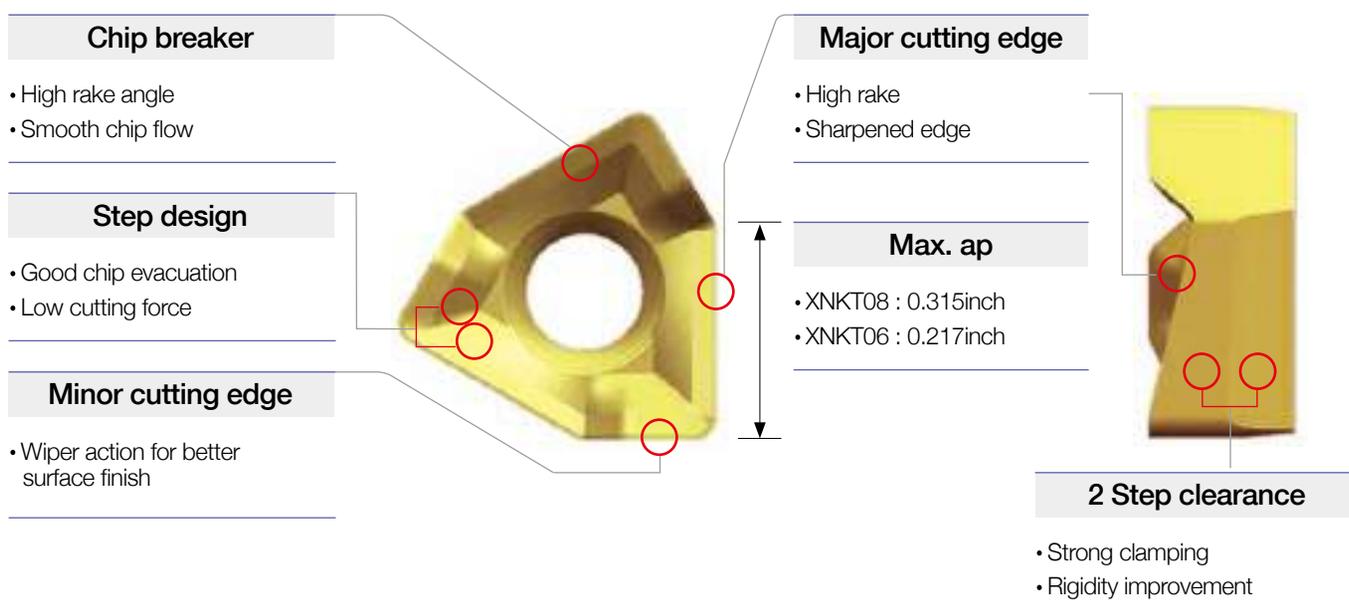

RM3

- **High Quality**
 - True 90° shouldering operation
- **Excellent Productivity**
 - Strong thick insert and 3-face clamping ensures stable machining even in tough cutting conditions
- **Great Value for Money**
 - Longer tool life due to optimized cutter and insert geometry

Insert Features

Chip Breaker Features

Chip breaker	Cutting edge	Applications	Features
<ul style="list-style-type: none"> • Chip breaker <p>MA</p> 		Aluminum	<ul style="list-style-type: none"> ■ MA : Milling Aluminum ■ Sharp cutting edge and buffed top face for an excellent chip flow and welding resistance in aluminum machining
<ul style="list-style-type: none"> • Chip breaker <p>ML</p> 		Light	<ul style="list-style-type: none"> ■ ML : Milling Light ■ Sharp cutting edge for hard-to-cut materials ■ Low cutting force
<ul style="list-style-type: none"> • Chip breaker <p>MM</p> 		General	<ul style="list-style-type: none"> ■ MM : General shouldering operations ■ 1st recommendation

RM3

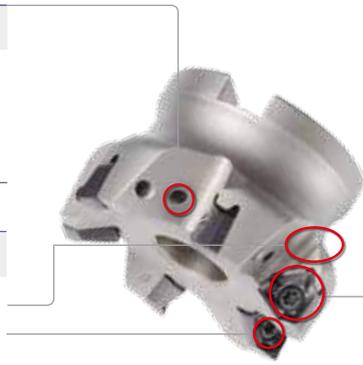

Cutter Features

Through coolant system

- Through coolant system providing a longer tool life due to direct cooling injection onto the cutting edge of the insert.

Excellent chip evacuation

- Wide chip pocket
- Simple Screw-on system

True perpendicularity

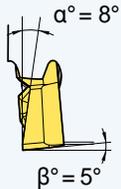

Strong clamping

- 3-face clamping seat
- Full flat bottom seat

Cutting Performance

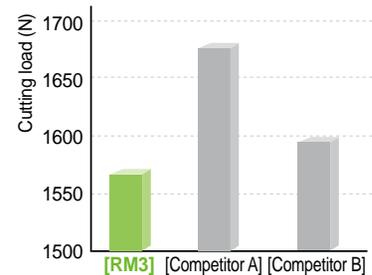

[Cutting edge]

- True positive clearance due to high rake angle
→ **Excellent machineability**

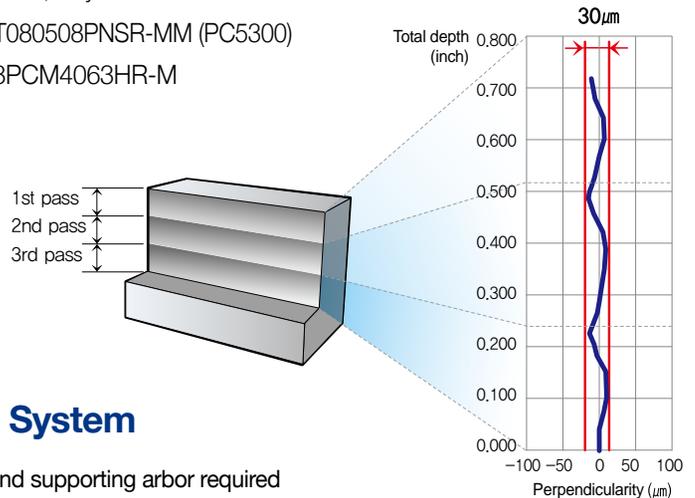

Cutting Load

- Workpiece A332-4140 (200HB)
- Cutting conditions $vc(\text{sfm}) = 820$, $fz(\text{ipt}) = 0.004$, $ap(\text{inch}) = 0.118$, dry
- Tools
Insert XNKT080508PNSR-MM (PC5300)
Cutter RM3PCM4063HR-M

Perpendicularity

- Workpiece A332-4140 (200HB)
- Cutting conditions $vc(\text{sfm}) = 820$, $fz(\text{ipt}) = 0.004$, $ap(\text{inch}) = 0.276 \times 3$ pass, $ae(\text{inch}) = 0.394$, dry
- Tools
Insert XNKT080508PNSR-MM (PC5300)
Cutter RM3PCM4063HR-M

Through Coolant System

- Exclusive through coolant bolt and supporting arbor required
- Effective coolant distribution directly onto the cutting edges
