

Emulsion service case

ARIANA

Application

For testing emulsions in line with TRGS 611.

Execution

- Thermometer to determine the temperature of the samples
- 100 each of nitrite and nitrate test rods
- 100 each of pH and water hardness test rods
- Plastic cup for sampling
- 3 x plastic bottles for sampling
- Pipette
- Maintenance and service plan for coolants
- Technical regulations TRGS 611

Advantage

- Reliable detection of emulsion suitability
- Enables early reaction and saves significant costs
