

Freddy Micro

Leading the way in coolant recycling 

The Freddy Micro is designed and built to the high standards and specifications that have made Freddy a trusted name, the Freddy Micro offers a new solution to your coolant recycling needs.

With a smaller footprint, lower 50 litres capacity and weighing less than any previous Freddy, it offers versatility, mobility and affordability.

- The most widely used and well-established coolant vacuum range in the world
- Recycles coolant and extends coolant life
- Enhances coolant performance and production quality
- Significantly reduces coolant usage
- Improves and extends tool life
- Extensively cuts waste disposal costs
- Removes contaminants that cause bacterial growth
- Removes contaminants that cause micro-abrasions which can lead to dermatitis
- Complete with 24 months warranty

Specification

- 50 litres tank capacity
- Finished in oil and acid resistant powder coated paint
- 37 litres perforated steel basket
- Comes with 51mm hose with rigid probe tool and flexible bench tool. (Also available with 38mm hose).
- Floor nozzle, 1m extension and crevice tool are also available
- Filters available from 1- 1,000µm

Freddy Micro Models

Capacity: 50 litres | Length: 670mm | Width: 430mm | Height: 980mm

Power unit	# of phases	Weight (empty)	Weight (full)	Airflow	Water flow in *	Water flow out
2kW 240v	1	58.3	109.3	3000	238	100
2kW 110v	1	58.3	109.3	3000	238	100

Weight in kilograms (kg) * Water flow tested using a 51mm hose at the same level as the fluid being vacuumed.
If the machine is higher than the fluid, flow rates will be slower than the quoted values.
Discharge by gravity through drain-off point.

Optional Freddy Service agreement

All of our Freddy coolant vacuums come with a 24 month warranty and optional 12 month service agreement, which includes:

- Two service visits per year- inclusive of labour and travel
- Priority on call outs
- Reduced breakdown call out charge
